SlimScription: Body Solutions

A woman's body is a very sensitive organism, constantly undergoing changes which manifest monthly and in various phases of life.

What shapes a woman?

There are many factors that are responsible for a woman's figure and shape. Hormones, genes, pregnancy and lifetime situations... what we mostly have in common are the areas and conditions that we wish to improve.

What can we improve?

- 1) Stubborn fat deposits.
- 2) Cellulite.
- 3) Uneven texture and tone.
- 4) Excess weight.

"Our techniques can produce dramatic results whilst improving confidence and self esteem. We offer both surgical and non-surgical solutions for the improvement of body shape, fat loss and conditions such as cellulite"
