## SlimScription Transfirmé™ Technique

We all strive to look and feel our best.

As we age, our skin elasticity decreases, collagen reduces and fat repositions which leaves the body and face less firm, contoured and defined.

### Why use the Transfirmé™ Technique?

The Transfirmé Technique is the ultimate in body and skin reshaping. Designed to reduce stubborn fat, tighten and contour the skin non-surgically.

The technique combines ultra sound and radio frequencies (skin tightening) to offer safe, effective and **guaranteed** results.

### Benefits of The Transfirmé™ Technique

- 1) Non-invasive / non-surgical
- 2) Painless / comfortable
- 3) Excellent treatment for cellulite
- 4) Facial and body skin tightening
- 5) May be combined with surgical procedures

## SlimScription: Transfirmé™ Technique

### Advanced Body Refinement and Cellulite Reduction

#### The Transfirmé Technique

Improves cellulite, tightens skin and improves the contours of the body. This unique, multi-layered medical heat therapy delivers therapeutic heat into the deep tissues... producing tightening, smoothing, firming and lifting results.

This breakthrough procedure reshapes the body and face whilst reducing stubborn fat by simultaneously tightening, firming and recontouring.

### Treat Multiple Body Zones

#### Which areas can be treated?

Abdomen, hips, buttocks, thighs, knees, upper arms, back and other areas of fat deposits.

It is also very effective in minor tummy tucks, body lifts and facial lifting.

Courses recommended:

**Body) 6 treatments Face) 6 treatments**

### Ultrasound Technology

#### How does Transfirmé Work?

The technique involves the combination of ultrasound and radio frequency. Primarily, the ultrasound breaks down the fat cells, releasing the fat as energy in to the system.

The radio frequency delivers heat in to the deep dermal tissues producing inflammation, collagen contraction and reproduction.

#### The Result?

Reduced volume, cellulite and skin tightening.
